## *Quick Start Guide*

**adaptec**<sup>®</sup>

# Before You Begin

To use your Adaptec XHub2<sup>®</sup>, you need:

- A PC-compatible notebook or desktop computer with:
  - A 266-MHz or faster processor
  - Windows<sup>®</sup> XP or Windows 2000
  - An available USB port
- One high-quality USB cable for each USB device you wish to connect to your XHub2. (High quality USB cables are available for purchase on the Adaptec Web site, at [www.adaptec.com/buy-cables](http://www.adaptec.com/buy-cables).)

## About USB 2.0 Performance

For your XHub2 and USB 2.0 devices to operate at USB 2.0 speeds, the XHub2 must be connected to a USB 2.0 port, and USB 2.0 drivers with hub support must be installed on your computer.

If your computer does not have a built-in USB 2.0 port, Adaptec recommends connecting your XHub2 to an Adaptec USB 2.0 adapter for the highest-quality USB 2.0 connection.

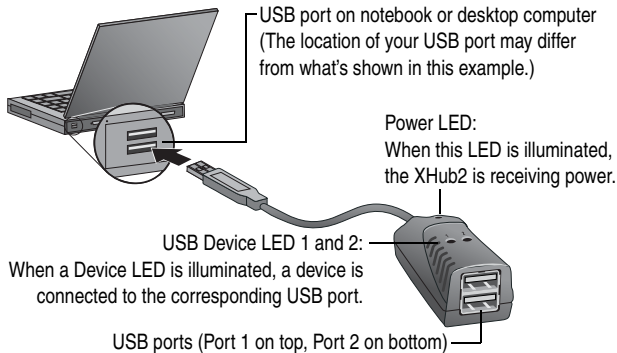

**Note:** USB 1.1 devices won't operate at USB 2.0 speeds, even if they're connected to a USB 2.0 hub or adapter.

# Plugging in Your XHub2

Follow the picture to connect your XHub2. You don't have to power off your computer before connecting the hub.

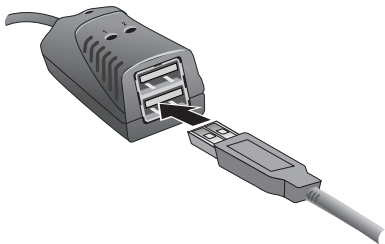

You do not need to install any device drivers. When your XHub2 is connected and your computer is powered on, your hub is ready for use.

## Unplugging Your XHub2

Your XHub2 is *hot-pluggable*, which means it can be connected and disconnected while your computer is on. (Your USB devices may not be hot-pluggable, however; see [Unplugging Your Devices on page 3](#) for more information.)

## Plugging in Your Devices

Follow this picture to connect your USB 1.1 and 2.0 devices to your XHub2. You can use either USB port on your hub.

**Note:** USB 1.1 devices won't operate at USB 2.0 speeds, even if they're connected to a USB 2.0 hub or adapter. See [About USB 2.0 Performance on page 1](#) for more information.

## Unplugging Your Devices

Device manufacturers support hot-plugging in different ways. Some devices (like CD-ROM drives) must be stopped before they are unplugged. Refer to your devices' documentation for disconnection recommendations.
